Tri Lakes Citizen Advisory Committee

March 13, 2017 6:00 P.M.

I. Call To Order

II. Review Minutes from February 6th, 2017

III. Meeting Posting Determination

IV. Local Lawn Applicator Project
- **a. Update of Lunch and Learn**
- **b. Next Lunch and Learn**

V. Water Testing Sites

VI. Shoreline Initiative

VII. Other Ideas for improvement for Lake Quality

VIII. University Update for Grants and Action.

IX. Set Next Agenda Topics and Date

X. Adjournment

14 Mile Water Shed Committee

MINUTES, March 13, 2017

The monthly meeting was called to order by Chairperson Steve Nowicki at 6:00 P.M., March 13th, at

Tri-Lakes building.

Roll Call: Wally Sedlar, Scott Provost, Carson Heinecke, Bill Mecozzi, David Trudeau, and Gerald Jensen.

Previous minutes were approved as presented, Motion by Scott Provost, Wally Sedlar 2nd. Motion carried. Also noted, were the new dates, for the Lunch and Learn for the Lawn applicators and the Agriculture people. Those dates are March 24th, and 31st, respectively, to be held at the Sherwood Lodge.

Wally has already been in touch with two different ag units, and received positive interest. Wally is especially reaching out to those interested in nutrient management.

We also presented a new lab release of the monitoring wells near the Wood County line. Scott is looking at them and noted high chloride, and pesticides. We will follow this up with more evaluation. The main thing is that we now have a base line.

Under the water initiative program: Wally presented a preview of the map of Camelot, and we discussed how color coding could show, what areas of shoreline had the least protection from shoreline runoff. The entire committee felt this was worth following up. Also, regarding bio engineering, the committee wants to check out Bio-Logs. Steve Nowicki will try to pick up information on those at the lakes convention in Steven Point, which will take place before our next meeting. A possible speaker to help explain this type of protection, is Nick Holmen from Goose lake, who some felt is quite knowledgeable in this area.

The committee will also get information on Submerged Water Turbines, for use in the finger areas to help delay the algae bloom in those areas, by increasing water movement. Scott P. will look into this.

U.W. grants are on hold due to potential EPA cuts, we will have to see how that progresses before we look for other action.

Other areas we want to investigate are the water pumps, Bio-logs, and upstream bank easements with the agriculture people. Cost estimates could be 5K per acre?

Next meeting date is April 1oth.

Motion by Scott to adjourn, seconded by Carson H. Motion carried, Adjourned at 7:30 P.M.
