TREE SALE!

14 Mile Watershed Friends and Supporters . . .

It's Winter and our thoughts turn to … Landscaping??? Actually, winter is the best time to sit back and think of ways to improve our properties! Not only can we beautify our land, if planned well, we can help to improve our watershed and ultimately, improve water quality. **To that end, we're happy to offer you bargain pricing on trees and shrubs to enhance your lot.** We have a fine selection of seedling-sized plants that, over time, will grow to full-size – all at a very economical price

.

Place your order prior to January 31st and pick-up will be scheduled for a date in late April or early May, depending on weather conditions. The date, time and location will be communicated directly to you this spring. We'll provide you with a fertilizer tab for each item ordered along with a planting instruction sheet. You may also want to consider ordering Root Gel – just mix it with 5 gallons of water and apply when you plant. The Root Gel will help to establish the seedling and get it off to a good start. Of course, further watering throughout the season will be needed.

All of our selections are native plants and over the upcoming years, will greatly enhance your

property. Natives offer extensive root systems which in turn will allow more rain to soak into our sandy soils and reduce runoff into the lakes. **You can make a difference for our lakes in your own backyard!** Native plants help soak up the rain and prevent flooding in our area. Now is the time to plan how you can add those deep roots to your yard.

Best of all, each item ordered is just $3! At these prices, quantities are limited, so first come, first served. Just complete the attached order form and submit before the end of January.

You can download and print a copy of the order form HERE.

2022 TREE & SHRUB SALE

Place your order now and plan to pick up in Rome late April or early May – date to be determined by Spring weather conditions and will be communicated to you. You will need to pick up on the specified date – if you cannot make it yourself, ask a friend or neighbor. Any items not picked up on the distribution date will not be reserved or refunded.

All individual seedlings will be sold at a flat rate of $3 (what a bargain!) and will include a fertilizer tablet and planting instructions. Root gel (1 oz makes 5 gallons and helps plant establishment) is also available for purchase.
